New Leroy Somer LL1500 Series Alternators

We are pleased to announce that we will be introducing a new LL1500 series alternator on our 26 - 33 kVA powered generator sets from our Larne Facility.

This change will replace the current Leroy Somer 1000 series alternator and provides improved motor starting capability for these models. The introduction will also result in a change of AVR from a R250 to R220. The LL1500 alternator will be effective on products built in Larne from 4th July 2012.

Model	Old Alternator	New Alternator	New AVR
P26-1S	LLB1014S	LLB1514J	R220
P26-4S	LLB1014S	LLB1514J	R220
P33-1	LL1014S	LL1514F	R220
P33-4	LL1014S	LL1514F	R220

22nd June 2012

P605-1, P660-1 & P688-1 Alternator Update

Please note there has been a change to the alternator model fitted on the P605-1, P660-1 & P688-1 models within the recently launched 455 – 750 kVA range. These models will be fitted with a 7000 series alternator as detailed below:

Generator Set Model	Alternator Model
P605-1	LL7024F
P660-1	LL7024F
P688-1	LL7024F

The change of alternator model is effective from first production of the new 455 – 750 kVA range (14th June 2012).
